1. SCOPE OF GRANT

ACS grants You the right to freely copy, access, download, display, print, and use this ACS Journal Article (the "Article") for Your personal, non-commercial research and educational use only. No further reproduction, distribution, display, or performance rights are granted.

2. PERMITTED USES

You may freely distribute the Article as an electronic file to colleagues, students, and others for their personal, non-commercial research and educational use.

3. PROHIBITED USES

You may not (i) use this ACS article for any commercial use, (ii) reproduce or distribute this ACS article for purposes of sale or licensing, (iii) make any adaptation of this ACS article, or (iv) copy, download, or post this ACS article, or any part thereof, for purposes of sale or licensing, for any fee.

4. TERM

This grant of permission is valid for select articles published previously.

5. COPYRIGHTS/OTHER INTELLECTUAL PROPERTY RIGHTS

Except as specifically permitted, all rights in this Article and Supporting Information are reserved by the ACS. Copying of the text and graphical material in this Article is prohibited except as permitted by Sections 107 or 108 of the U.S. Copyright Act, 17 U.S.C. Sections 107 or 108, and/or copyright policies of the owner.

6. DISCLAIMER OF WARRANTIES, LIMITATION OF LIABILITY

ACS has made every effort to ensure that the information is complete and accurate, but does not represent or guarantee that it is free of error. ACS disclaims all warranties, express and implied, including, but not limited to, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement, with respect to the Article and Supporting Information.

7. GENERAL

The ACS makes no warranty, express, implied, or statutory, regarding the Article. Neither the ACS nor its members nor employees are responsible for any errors in, or omissions from, the Article or Supporting Information.

8. ACCEPTANCE

You have been granted this permission on the conditions specified in this Agreement. ACS reserves the right to withdraw this permission at any time, in its sole discretion.

This ACS article is protected by copyright and is the property of the American Chemical Society (ACS). You may reproduce limited portions of this article for personal, non-commercial use only, so long as you respect the following restrictions: (a) you may not reproduce, distribute, display, perform, or sell copies of the Article, or any portion thereof, and (b) you may not adapt, translate, or make derivative works from the Article without prior written permission from the ACS.
